Elite Series by Enerlites Brings a New Level of Customization to the Home

In line with the growing trend of DIY home upgrades and remodels, Top Greener, Inc., a leading online retailer of lighting and home automation products, is pleased to bring more customization options to lighting and home electrical outlets.

The Elite Series by Enerlites is a unique collection of lighting solutions with a low profile design and elegant smooth finish. The collection of light switches, receptacles, and wall plates is a natural fit for Top Greener, Inc.'s existing product line. In addition to the standard white and ivory colors, Elite Series products also come in gold, silver, nickel, dark bronze, and black matte finishes.

"These less common color choices give our customers the upgraded look and fresh new feel they want from a brand they've already come to trust," says Marketing Director Ludwig Ortiz.

The variety of wall plates, light switches and receptacles are made with unbreakable polycarbonate thermoplastic. Ortiz continues, "The unbreakable material ensures that even if something as thin as a wall plate gets bent during transport or installation, the unit will go right back to its original form."

Elite Series screwless wall plates replace existing 1, 2, and 3 gang wall plates. The smooth decorator style rocker switches upgrade existing toggle switches. The tamper-resistant UL listed duplex outlets replace any 15 amp electrical outlet in commercial and residential locations. Used in combination, these Elite Series items enhance the look of a room with an instant contemporary feel and upscale appeal.

Top Greener, Inc. has been an authorized reseller of Enerlites products for over five years and is proud to carry their new collection. They plan to continue building out contemporary collections to offer unique variations and customized features for lighting and electrical products.
